

Professional Background:

I have been a KS2 teacher for 6 years, teaching in Year 3,4,5 and 6. As a trainee teacher, I attended a range of mastery training and throughout my early teaching career I worked very closely with a mastery specialist within my school setting. I am currently the Year 5/6 phase leader and Year 6 teacher at my school and lead ITT sessions in maths for two providers in Portsmouth.

Maths Hub Journey:

I have been really lucky to be part of the Maths Hub ever since I started my teaching career. During my early career, I was trained by Jess and was fortunate enough to have a mastery specialist within my school, who I now work alongside as an LLME. This gave me a passion for maths and this led to exploring more ways to be part of the maths hub and develop my CPD and knowledge of maths teaching. I began my work as an LLME in 2021 when I expressed an interest in delivering training to ITT students and workgroups, which Jess helped me to become part of. Being part of the LLME has developed my understanding of being a leader, given me countless CPD opportunities and helped me to develop my extensive knowledge and skills in maths teaching in primary schools. I now run two ITT workgroups within Portsmouth and a lead teaching assistant workgroup with the maths hub.
