

**Professional Background:**

I worked for 18 years in accountancy, audit and tax for a large audit firm and a small local firm. I retrained as a secondary maths teacher in 2018 and am now teaching at The Romsey School in Hampshire. I am passionate about financial education and lead the The Romsey School's Centre of Excellence for Financial Education accreditation. I am currently working on my Postgraduate Certificate in Educational Practice (Mathematics) with the University of Chester to develop my expertise in leading mathematical professional development.

**Maths Hub Journey:**

I am the Mathematical Thinking workgroup lead. This role gives me opportunity to reflect on my own teaching as well as supporting that of others. It has opened up the door to a network of like-minded professionals in secondary but also primary and post 16 education and given me the option of further study via the PD lead course and as a result the Postgraduate Certificate in Educational Practice.
